

Exhibition Announcement: BATTERY JAPAN 2026

The 20th International Rechargeable Battery Expo

Takatori Corporation will exhibit at **BATTERY JAPAN 2026 – The 20th International Rechargeable Battery Expo**, to be held from March 17 to 19, 2026.

Utilizing the technologies cultivated through our Go-Tech projects, we will propose optimal products to those in the battery industry, including die-cutting and stacking technologies and vacuum technologies that our company has developed over many years.

At this exhibition, we intend to investigate the latest technology trends while actively promoting information exchange and strengthening cooperation with key players in the industry.

We sincerely hope you will look forward to our future initiatives. We will continue striving to provide new proposals that will assist your business, and we look forward to welcoming your visit.

Leave your battery manufacturing equipment needs to Takatori — trusted technology supporting the cutting edge.

Exhibition Highlights

Live Equipment Demonstration:

- All-solid-state battery die-cutting and stacking machine
- Vacuum lamination machine

Panel Displays:

- Stacking and binder removal machine for all-solid-state batteries

Venue Information

Venue: [Tokyo Big Sight, Japan](#),

Exhibition Hall: [South Exhibition Halls 3 & 4](#)

Zone: [Next-Generation Battery Zone](#), Booth No.: [S23-20](#)
